The programme reflects the theme of **'Keeping Pace with Change'** with presentations outlining new treatments and suggestions for addressing changes in the management of renal services to minimise the consequences of the projected increase in demand for renal replacement therapy in England of an average of 6-10% per annum during the next ten years, as described in Part II the Renal National Service Framework. We will again be featuring Patients View slots but instead of the usual Question Time session, a debate will be held with audience participation on a topical controversial subject. Workshops will again be held on Sunday morning for those who do not need to attend the Council meeting.

This is a full programme with something for everyone but it is also a social occasion which gives everyone the opportunity to exchange views and meet old and new friends.

The Programme includes:

- **The Ticking Time Bomb - Identifying CKD patients**
- **Calcimemetics - new treatment for hyperparathyroidism**
- **Skin Care - Insight into the SIA Scope Research project**
- **Investigation into donor relative refusal**
- **Increasing transplant numbers**
- **Debate**
- **Patients Views**

Friday: KPA Chairmen's Workshop.

Identifying Chronic Kidney Disease patients - will it affect your KPA?

Sunday: Council meeting

**Workshops: 1. Psychological Aspects of Kidney Failure
2. tbc**
