

Kidney disease and women's health

8 March
2018

World Kidney Day
is a joint initiative of:  

Help us bring together millions of people across the world and unite with one powerful voice for kidney health awareness.

We are encouraging individuals and patient groups to work together with renal/transplant units in hospitals all over the UK, to support the day by organising an activity or event. The aim is to draw public attention to the importance of maintaining a healthy lifestyle to keep the kidneys healthy, what can be done to protect kidneys before disease strikes, and to assist patients who already have chronic kidney disease. Following the global theme, there will also be a focus on kidney disease and women's health.

Ideas for activities and downloadable resources will be available at www.worldkidneyday.co.uk

Contact info@worldkidneyday.co.uk to register your interest and apply for a support pack

World Kidney Day in the UK is led by the Kidney Charities Together Group
